

MVA

Direct expansion variable refrigerant flow system VRF

Cooling capacity 12,1 ÷ 246,0 kW
Heating capacity 14,0 ÷ 276,0 kW

- Units prepared for installations with two or three pipes.
- The correct balance between cost, efficiency and space.
- Wide choice of indoor units available.
- Up to 80 connectible indoor units.

DESCRIPTION

The VRF air conditioners from the MVA range are combined with indoor units:

- MVA_WL - **Wall**.
- MVA_D - **Horizontal duct**.
- MVA_DH - **Horizontal duct, high head**.
- MVA_DV - **Vertical duct**.
- MVA_CS and MVA_C - **8-way cassette**.
- MVA_CB - **4-way cassette**.
- MVA_C1 - **1-way cassette**.
- MVA_F - **Floor ceiling**.
- MVA_FS - **Console**.
- MVA_V - **Column**.
- MVA_ERV - **Heat recovery unit**.

TYPE OF INDOOR UNIT

MVA_WL

Wall indoor unit designed to be installed on indoor walls.

- Modern design to blend with all furnishing styles.
- Distributed air jet: air outlet louvers with horizontal and vertical adjustment facility.
- Anti-freeze function that allows a minimum temperature of 8 °C to be maintained in the environment during the winter period.

MVA_D

Duct indoor unit designed for indoor duct type installation.

MVA_D - Horizontal duct.

- Wired panel standard supply.
- Low noise levels.
- Easy installation in small assembly spaces, thanks to the limited dimensions.
- Useful static pressure up to 80 Pa.

MVA_DH

Duct indoor unit designed for indoor duct type installation.

MVA_DH - Horizontal duct, high head.

- Wired panel standard supply.
- Unit without cover, designed for duct type horizontal installation.
- Useful static pressure up to 200 Pa.

MVA_DV

Duct indoor unit designed for indoor vertical installation.

MVA_DV - Vertical duct.

- Wired panel standard supply.
- Unit without cover, designed for installation in wall recesses.
- Useful static pressure up to 60 Pa.

MVA_CS / MVA_C

8-way cassette indoor unit designed to be installed on false ceilings indoors.

MVA_CS - Cassette 570x570.

Mandatory accessory GLG40S.

MVA_C - Cassette 840x840.

Mandatory accessory GLG40.

- Wired panel standard supply.

— Condensate discharge pump as standard.

— Guarantees even air distribution, for optimum comfort.

MVA_CB

4-way cassette indoor unit designed to be installed on false ceilings indoors.

MVA_CB - Cassette 910x910.

Mandatory accessory GL40B.

- Wired panel standard supply.

— Condensate discharge pump as standard.

— Guarantees even air distribution, for optimum comfort.

MVA_C1

1-way cassette indoor unit designed to be installed on false ceilings indoors.

MVA_C1 - Cassette 987x385.

Mandatory accessory GLC1.

- Wired panel standard supply.
- Condensate discharge pump as standard.
- Compact size and minimum dimensions.

MVA_F

Floor ceiling indoor unit to be installed on walls or ceiling.

- Low noise levels.
- Anti-freeze function.
- Flexible installation for any environment.

MVA_FS

Console indoor unit designed to be installed on the floor.

- Anti-freeze function.
- 5-speed fan, to meet every possible need.
- Two delivery vents for optimal control of the air flow.

MVA_V

Column indoor unit designed to be installed in large sized rooms.

- Easy installation and maintenance.
 - Speed in reaching the defined set point in the shortest time possible.
 - Ideal for installations in the service sector: hotels, restaurants, offices.
- General features**
- Operating mode: cooling, heating, dehumidification, automatic and fan only.
 - Total capacity connected to the outdoor units between 50% and 135% of the rated capacity of the selected configuration.
 - Indoor unit fitted standard with an electronic expansion valve.
 - **WRC** wired panel standard supply with each indoor unit.
 - Every indoor unit comes with a remote control and a remote control holder.
 - Automatic unit adjustment function.
 - Particularly quiet operation.
 - Microprocessor control.
 - Auto-restart function.
 - Self-diagnosis function.
 - Easy installation and maintenance.

TYPE OF INDOOR UNIT - HEAT RECOVERY

MVA_ERV

Heat recovery units designed for duct-type horizontal installation indoors. Fitted with a cross-flow enthalpic heat recovery unit with recovery efficiency higher than 70%. The heat exchanger allows energy to be transferred from the exhaust air to the fresh air, avoiding any direct mixing of the air flows.

This range of heat recovery units ensures constantly clean and filtered fresh air, a constant air flow rate, and rooms with comfortable temperature and humidity levels, ensuring reduced energy consumption in every application.

The device is also equipped with a direct expansion coil to allow the air flow delivered into the room to give off or absorb heat. This means that the unit not only guarantees correct air renewal, but also helps cool or heat the rooms and avoid air currents with a marked temperature difference in relation to the room temperature, to ensure optimum comfort for the occupants.

Operating mode

Every indoor unit comes with a wired panel. The wired panel can be used to set the standard cooling, heating, dehumidification and ventilation-only modes, plus the following operating modes.

- **Bypass with free cooling and night-time free cooling operation:** night-time free cooling operation reduces the thermal load in the rooms, taking advantage merely of the outside temperature difference and therefore boosting energy savings for the following day thanks to free night-time cooling.
- **Control of different inlet and outlet air flow rates:** known as "positive pressure operating mode" when the inlet air flow rate is higher than the recovery one, or "negative pressure operating mode" in the opposite situation.

Mixed connection indoor units + MVA_ERV

In case of mixed systems, i.e. consisting of indoor units of the MVA and units, MVA_ERV to guarantee the proper operation of the system, the nominal cooling powers of the indoor units is between 50% and 100% of the nominal cooling power of the system of external units and that the sum of the installed nominal power of the MVA_ERV units does not exceed 30% of the power of the external units system.

Connections with MVA_ERV units only

In case of systems made up only by units, MVA_ERV to guarantee the proper operation of the system, check that the sum of the nominal cooling powers of the indoor units is between 50% and 100% of the nominal cooling power of the external units system.

General features

- Wired panel standard supply with each indoor unit.
- Particularly quiet operation.
- Centrifugal fans with 5-speed brushless DC motor.
- Units fitted with an electronic expansion valve as standard.
- Filters with G4 efficiency level on inlet and outlet air.
- Alarm signal for filter cleaning.
- Timer for programming unit switch-on and switch-off.
- Incorporated electrical panel with electronic card to control the ventilation and free cooling functions.
- Easy installation and maintenance.

TYPE OF OUTDOOR UNIT

MVA_S

- Standard multisplit VRF air conditioners.
Reversible air/air heat pump with DC inverter technology.
- From 1 to 16 connectible indoor units.
 - Total maximum length of the refrigerant lines up to 300 m.
 - The sizes MVAS1201S - MVAS1401S - MVAS1601S and MVAS1201T - MVAS1401T - MVAS1601T, are fitted with a base electric resistor to avoid possible formation of ice and encourage the disposal of the condensate during the heating operation.
 - Compressor and fan with DC inverter technology.
 - Fitted with an electronic expansion valve.

MVA_M

- Module multisplit VRF ambient air conditioner for 2-pipe systems.
Reversible air/air heat pump with DC inverter technology.
- From 1 to 80 connectible indoor units.
 - Total maximum length of the refrigerant lines up to 1000 m.
 - Modular system with base modules that can be combined together, up to a maximum of 4, for a total of 33 recommended combinations.
 - Compressor and fan with DC inverter technology.
 - Fitted with an electronic expansion valve.
 - Optimised management of the compressor operating time with partial loads.
 - Emergency operation, in the event of problems with the compressors or fans, allows operation of the system with a reduced number of compressors and/or fans for a limited time.
 - Channelled air delivery from 0 Pa (default) to 82 Pa of effective static head set via dip switches.
 - **For cooling line connections, refer to refnet joints in the accessories section.**

Special golden fin coil

Unlike normal batteries, this special golden epoxy coating silicon free is able to protect the heat exchanger against rust and corrosion, in areas where the air has a high salt content.

General features

- Operating mode: cooling, heating, dehumidification, automatic and fan only.
- Refrigerant connections with braze welded Y and F joints (mandatory accessories).
- Compressor and fan with DC inverter technology.
- Particularly quiet operation.
- Microprocessor control.
- Auto-restart function.
- Self-diagnosis function.
- Easy installation and maintenance.
- Serial communication in CanBus protocol.

ACCESSORIES

CC2: Centralised control with 7" touchscreen display for managing several indoor units within a number of multisplit systems. The centralised control has an integrated external contact. For more information, refer to the specific documentation.*

MVASZC: Simplified centralised control (4,3" touch screen display), which can be used to manage up to 32 Indoor Units distributed across a maximum of 16 Systems.

WRC: Wired panel with liquid crystal display and soft-touch buttons.

WRC1: Simplified wired panel with liquid crystal display and soft-touch buttons with built-in external contact. This panel is particularly suitable for hotel applications.

* **The CC2 centralised control can manage up to 255 indoor units distributed over a maximum of 16 MVA systems.**

For more information about the accessories and their functions (such as the auto-restart function), refer to the specific documentation of the single accessory.

AHUKIT: Kit comprised of a box that contains the thermal expansion valve(s) complete with wiring and their control module, with pre-wired probes, a wall-mounted control panel with external contact. The kit

is intended to be combined with the direct expansion cooling and/or heating coil (using R410A) of an air treatment unit. The latter is not supplied as an MVA component, but is functionally connected to an MVA system and is suitably sized. AHUKIT, and the air treatment unit connected to it, treat the recirculated and/or fresh air that falls within the operating limits, regulating the recirculation/expulsion air temperature.

MINIMODBUS10: Thanks to its smaller size, this accessory can be easily installed in the outdoor unit. It allows you to manage up to 16 MV systems (with a maximum of 255 indoor units), with a ModBus RTU serial on RSA485 for supervision with an external BMS.

MVAGW: This accessory allows you to manage up to 16 MV systems (with a maximum of 255 total indoor units), making available a serial in ModBus RTU protocol on RS485, ModBus TCP or BACnet / IP for supervision with an external BMS.

USBDC: The kit includes a converter (from CanBus to ModBus) and the VRF debugger software. IT is designed to meet the requirements of after sales services and qualified technicians who need to carry out control and debugging procedures on the MVA ranges.

Accessories mandatory

Air delivery and recovery grille for indoor **Cassette** type units.

Joints refnet

Connection between modular outdoor units.

The modules are easy to install and link together from the cooling point of view, thanks to the connections with dedicated refnet joints. Modularity is the fundamental characteristic of these systems as it also allows high-capacity systems to be created in a quick, simple way.

Y-joints for cooling connection between 2 Outdoor Units in Modular Systems. **A modular system made up of n. base modules requires n-1 Y-joints.**

Mandatory accessory for modular systems.

ADVANTAGES FOR VRF SYSTEMS: MVA

Compact design

Thanks to the reduced dimensions and compact design of these units, they are easy to move at the job site. All the models can in fact be transported easily right up to the roof, even using a lift.

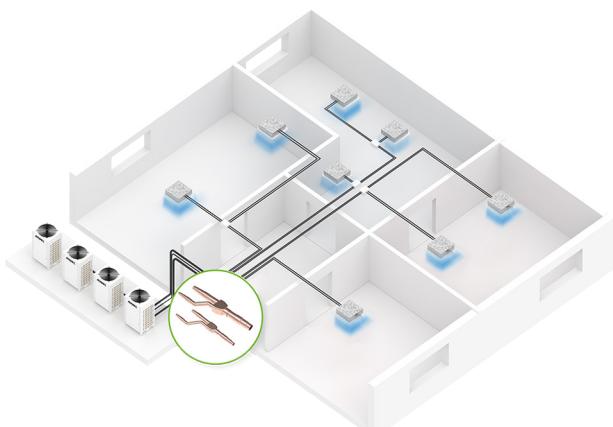

VRF systems - 2-pipe heat pump

Customise your VRF system

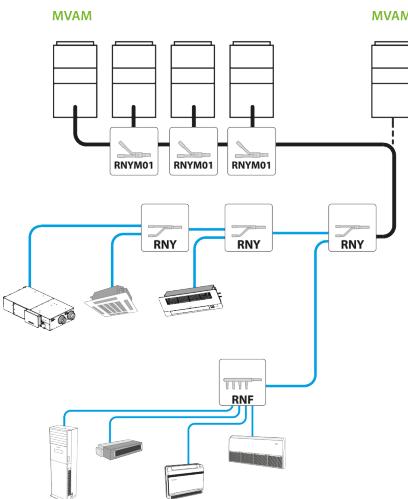

To guarantee greater seasonal efficiency and maximum comfort with the variable refrigerant function.

Continuous comfort

Continuous heating or cooling of the rooms is what makes the VRF system a valid alternative to hydronic systems.

Example of a 2-pipe system

When dimensioning the cooling lines, exclusively refer to the technical manual.

A modular system made up of n base modules requires n-1 Y-joints.

MVAS - MVAM

- 2-pipe system.
- Cooling or heating mode. (The image shows an example of a system in cooling mode)
- Maximum total length of cooling lines: **MVAS**: 300 m, **MVAM**: 1000 m

(1) Cooling: room air temperature 27 °C d.b. / 19,5 °C w.b.; outside air temperature 35 °C; turbo speed; cooling line length 5 m; indoor and outdoor units at the same height.

(2) Use the finned pack heat exchanger power (cooling) to make the calculation and select the unit.

(3) Heating: room air temperature 20 °C d.b.; outside air temperature 7 °C d.b. / 6 °C w.b.; turbo speed; cooling line length 5 m; indoor and outdoor units at the same height.

(4) Thermal efficiency complying with European regulation EU 1253/2014.

(5) Performances referring to clean filters.

The air flow rate is calculated on the basis of the nominal high static pressure at high fan speed. It may vary according to the real installation conditions.

The nominal static pressure is the effective pressure value declared for a standard unit when it leaves the factory. The use of other filters may alter the unit performance values.

Il mondo Aermec

Fondata nel 1961 da Giordano Riello, Aermec è considerato uno dei principali fra i produttori europei di macchine per la climatizzazione. Ha rapidamente esteso il proprio know-how verso nuove applicazioni, tra cui il controllo del processo di vinificazione, il process cooling e la refrigerazione industriale in genere. Oggi Aermec, grazie all'ennesima intuizione del suo fondatore Giordano Riello, gioca un ruolo di primo piano, su scala mondiale, nelle applicazioni alle medie e basse temperature: importanti aziende del settore della refrigerazione scelgono Aermec per rispondere alle esigenze di un moderno processo tecnologico. La sfida per Aermec è stata quella di sviluppare prodotti innovativi, flessibili e robusti ad elevata efficienza, integrati in sistemi di gestione intelligenti, capaci di ridurre il consumo complessivo di energia e rispondere in maniera puntuale alle esigenze di utenti sempre più attenti ai bilanci e all'applicazione delle ultime tecnologie.

Aermec's World

Founded in 1961 by Giordano Riello, Aermec is rated one of the leading European manufacturers of air conditioning units. We were quick to extend our know-how to new applications, including wine-making process control, process cooling and industrial refrigeration in general. Today, the unfailing intuition of founder Giordano Riello has established Aermec as a key player on the world stage in medium and low temperature applications: leading businesses in the refrigeration industry choose Aermec to meet the demands of a modern hi-tech process. Our challenge has been to develop reliable, innovative, flexible and highly efficient products, integrated in smart management systems, capable of reducing overall energy consumption and catering to the demands of users who are increasingly budget conscious and discerning when it comes to applying the latest technologies.

Condizionatori ambiente

Una gamma completa, in grado di risolvere ogni problema di climatizzazione: questo è Aermec per i condizionatori d'ambiente. Completezza non solo di modelli ma di alternative e possibilità: tecnologie d'avanguardia, come quella inverter che consente di ottimizzare le prestazioni in ogni momento in relazione alla temperatura impostata e di ottenere forti risparmi energetici; versatilità di installazione, per risolvere nel migliore dei modi ogni problema di spazio. Qualità di progettazione e di materiali, potenze in raffreddamento e riscaldamento adatte a coprire tutte le esigenze sia nel settore residenziale che nel commerciale, raffinatezza di design esclusivo completano le caratteristiche della gamma, che pone Aermec a livelli di eccellenza di mercato.

Room air conditioners

A complete range of units designed to meet all climate control requirements: Aermec the answer to air conditioning. A vast choice not only in terms of models but also alternatives and possibilities: state-of-the-art technologies such as the inverter that optimises performance at all times according to the set temperature to achieve maximum energy saving; versatile installation options to solve all problems of space. Quality design and materials, cooling and heating power suited to cover all requirements both in the residential and commercial sector, exclusive elegant design complete the range features, ranking Aermec among the leaders on the market.
