

NRL
0750/1800
cooling only

Air cooled chillers with axial fans
Cooling capacity 174kW÷469kW

Variable Multi Flow®

VMF

R410A

Aermec adheres to the EUROVENT Certification programme up to 600kW cooling. The products concerned appear in the EUROVENT Certified products guide.

- **HIGH EFFICIENCY VERSION**
- **LOW NOISE HIGH EFFICIENCY VERSION**
- **COMPACT VERSION**
- **LOW NOISE COMPACT VERSION**

- **2 REFRIGERANT CIRCUITS**
- **PUMP ASSEMBLY OPTION**
- **PUMP ASSEMBLY AND TANK OPTION**

Characteristics

- Available in 9 sizes
- Refrigerant R410A
- 2 refrigerant circuits
- High efficiency even at part load
- Heat exchangers optimised to benefit from the excellent heat transfer characteristics of R410A
- High efficiency scroll compressors
- Axial fans with low sound level
- Solid construction with polyester anti-corrosion painted finish
- Operating limits in cooling up to 46 °C ambient
 - Maximum leaving water temperature 18 °C
- Versions available:
 - Compact cooling only
 - L Compact low noise cooling only
 - A High efficiency cooling only

- E** **High efficiency low noise cooling only**
- C** Condensing unit
- Expansion valve (selected in unit configurator):
 - (*) standard thermostatic expansion valve
 - (Y) thermostatic expansion valve for low liquid temperature down to -6 °C
 - (X) electronic expansion valve, also for low liquid temperature (down to -6 °C)
- Fan unit (selected in unit configurator):
 - "◦" Standard
 - "M" High static pressure
 - "J" Inverter
- Pump assembly and buffer tank options complete with water filter, flow switch, expansion tank, charging point, and anti-freeze electric heater
- Microprocessor control system:

- Control from the entering water temperature, with the possibility of selecting control of the leaving water temperature
- Summer condensation control with 0-10V modulating signal depending on pressure, compensated according to the outside air temperature (with DCPX accessory)
- Automatic rotation of compressors and pumps based on operating hours (manual rotation sizes 1400 to 1800)
- Load limiting safety control
- Low and high pressure transducers (standard for all units)
- Automatic reset of alarms before tripping
- Display in 4 languages
- Alarm history

Accessori

- **AERSET**: The AERSET accessory allows the automatic compensation of the operating set-point of the unit to which it is connected, based on a 0-10V MODBUS input signal. Mandatory accessory: AER485 or MODU-485A
- **AER485**: RS-485 interface for supervision systems with MODBUS protocol.
- **AVX**: spring anti-vibration mounts Select the AVX model from the compatibility table.
- **DCPX**: Low ambient device for cooling operation below 10 °C down to -10 °C. Pressure transducers read the condensing pressure and the electronic controller varies fan speed to maintain adequate pressure for correct unit operation.
- **DRE**: Soft starter (current reduction of about 30% for single circuit units, 26% for two circuit units, 22% for three circuit units). Only available for 400V-3-phase power supply. Factory fitted only.
- **GP**: Protection grille protects the external coil from accidental damage.
- **PGS**: Daily/Weekly Programmer. Allows two

- daily time-clock programmes (two switch on/off cycles) and different programmes for each day of the week.
- **RIF**: Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current. Must be requested at time of order and is available factory fitted only.
- **AERWEB300**: Accessory AERWEB allows remote control of a chiller through a common PC and an ethernet connection over a common browser; 4 versions available:
AERWEB300-6: Web server to monitor and remote control max. 6 units in RS485 network;
AERWEB300-18: Web server to monitor and remote control max. 18 units in RS485 network;
AERWEB300-6G: Web server to monitor and remote control max. 6 units in RS485 network with integrated GPRS modem;
AERWEB300-18G: Web server to monitor and remote control max. 18 units in RS485 network with integrated GPRS modem;

- **DUALCHILLER**: Simplified control system to switch on/off and control two chillers in a single system (using Aermec GR3 command), as if they were a single unit.
- **MULTICHILLER**: Control system for multiple parallel installed constant flow chillers providing individual chiller on/off and control capability.
- **TRX1**: Metal cap that replaces the plastic cap, mounted as shipping protection, for immersion heater holes in the buffer tank.
- **VT**: anti-vibration mounts, to be fitted below the unit base.
- **PRM1 and PRM2**: FACTORY FITTED ACCESSORY. A manual reset pressure switch wired in series with the existing high pressure switch installed on the compressor discharge line.
- **COMPATIBILITY with the VMF SYSTEM** For more information on the system refer to the manual.

NOTE: For the selection of AVX refer to the technical manual

Unit Configurator

By suitably combining the numerous options available it is possible to configure each model in such a way as to meet even the most demanding of system requirements.

Configuration fields:

Code:

NRL

Size:

0750, 0800, 0900, 1000, 1250, 1404, 1504, 1655, 1800

Expansion valve:

- - Standard thermostatic expansion valve for water temperature down to +4 °C
 - Y - Thermostatic expansion valve for low liquid temperature down to -6 °C
 - X - Electronic thermostatic valve, max. temp. of water produced: +4°C
(for lower temperatures please contact us)

Model:

- - Cooling only
 - C - Condensing unit

Heat recovery

- - Without heat recovery
 - D - With partial heat recovery (desuperheater)
 - T - With total heat recovery (not available with buffer tank)

Version:

- - Compact
 - L - Compact low noise
 - A - High efficiency
 - E - High efficiency low noise

Coil:

- - Aluminium
 - R - Copper
 - S - Tinned copper
 - V - Coated aluminium

Attention:

- options D - T - C are not compatible with option Y
 - the standard options are shown by the symbol °

Example of configuration code: NRL0900*****00

This is an NRL unit of size 900, with standard thermostatic expansion valve, cooling only model, without heat recovery, compact version, with aluminium condenser coils, standard fans, and electrical panel for compressor motors 400V 3~ 50Hz, without pump or buffer tank.

Fan:

- - Standard
 - M - High static pressure
 - J - Inverter

Power supply:

- - 400V 3~ 50Hz with circuit breakers
 - - 400V 3N~ 50Hz with circuit breakers (only NRL 0750)

Integrated hydronic module:

- 00 - without pump or buffer tank
 - 01 - single low head pump and buffer tank
 - 02 - single and standby low head pump and buffer tank
 - 03 - single high head pump and buffer tank
 - 04 - single and standby high head pump and buffer tank
 - 05 - single low head pump and buffer tank (with holes for immersion heaters)
 - 06 - single and standby low head pump and buffer tank (with holes for immersion heaters)
 - 07 - single high head pump and buffer tank (with holes for immersion heaters)
 - 08 - single and standby high head pump and buffer tank (with holes for immersion heaters)
 - 09 - double hydraulic circuit (with holes for immersion heaters)
 - 10 - double hydraulic circuit with immersion heater
 - P1 - single low head pump without buffer tank
 - P2 - single and standby low head pump without buffer tank
 - P3 - single high head pump without buffer tank
 - P4 - single and standby high head pump without buffer tank

Sound power:

Aermec determines sound power values on the basis of measurements made in accordance with UNI EN ISO 9614-2, as required for Eurovent certification.

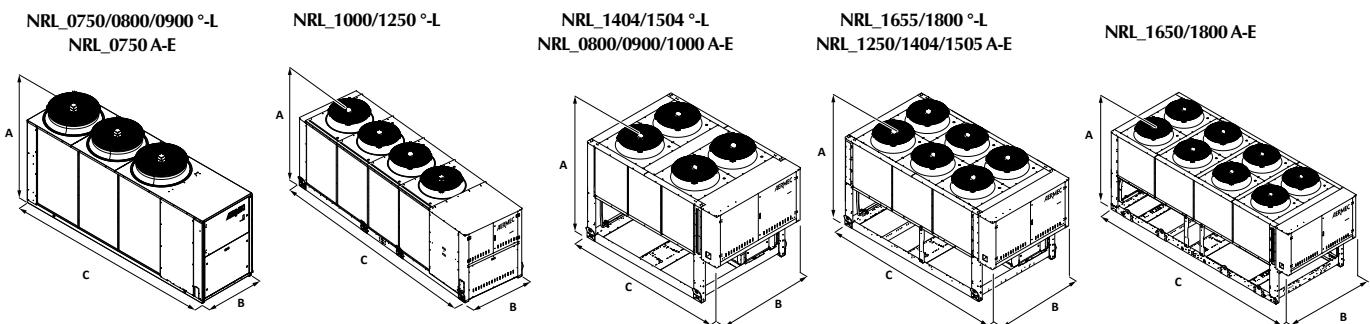

Sound pressure:

Sound pressure in free field, at 10 m distance from the external surface of the unit (in accordance with UNI EN ISO 3744)
