

NRL 2000/3600 free-cooling

R410A

Air cooled chiller with axial fans
Cooling capacity from 446 kW to 904 kW

- **HIGH EFFICIENCY VERSION**
- **LOW NOISE HIGH EFFICIENCY VERSION**
- **PUMP ASSEMBLY OPTION**

- **4 REFRIGERANT CIRCUITS**
- **PUMP ASSEMBLY AND BUFFER TANK OPTION**

Characteristics

- Available in 7 sizes
- Refrigerant R410A
- 4 refrigerant circuits
- High efficiency even at part load
- Heat exchangers optimised to benefit from the excellent heat transfer characteristics of R410A
- High efficiency scroll compressors
- Axial fans with low sound level
- Solid construction with polyester anti-corrosion painted finish
- Operation up to 44°C ambient in cooling mode
- Operation modes:
 - Free-Cooling only: is the most economical way to use the unit. Only the fans operate by speed control. Cooling is achieved completely from the external air temperature
 - combined Free-Cooling and compressors: the cooling capacity is achieved from the external air temperature combined with compressor

- operation at full or partial load
- compressors only: the cooling capacity is provided entirely by the compressors (standard operation of a chiller)
- Versions available:
 - High efficiency
 - High efficiency low noise
 - Glycol free
 - With pump assembly (high head, with/without standby pump)
 - With pump assembly and 700 litre buffer tanks complete with water filter, flow switch, expansion tank, charging point and anti-freeze electric heater
 - Electronic expansion valve
 - Inverter fans
- Microprocessor control system of the compressors and fans for the control of the three operating modes (Free-Cooling only, combined

Free-Cooling and compressors, and compressors only)

- Display of all operating parameters in 4 languages.
- Simplified remote control panel located up to 50 m distance away with shielded cable. Permits basic control and alarm notifications of the unit
- High efficiency air-water coil (Free-Cooling) with smooth tubes and wavy fins
- Three-way valve installed on the hydraulic circuit to modulate flow to the Free-Cooling coils
- High and low pressure transducers (standard for all versions)
- Fan speed controller for low ambient operation. In Free-Cooling mode controls capacity.

Accessories

- **AER485P1:** RS-485 interface for supervision systems with MODBUS protocol.
- **PGS:** Daily/Weekly Programmer. Allows two daily time-clock programmes (two switch on/off cycles) and different programmes for each day of the week.
- **GP:** Protection grille protects the external coil

- from accidental damage.
- **AVX:** spring anti-vibration mounts.

Factory fitted accessory

- **RIF** Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current. Must be requested at time of

order and is available factory fitted only.

- **PRM1 and PRM2: FACTORY FITTED ACCESSORY.** A manual reset pressure switch wired in series with the existing high pressure switch installed on the compressor discharge line.

Unit Configurator

By suitably combining the numerous options available it is possible to configure each model in such a way as to meet even the most demanding of system requirements.

Configuration fields:

Code:

NRL

Size:

2000, 2250, 2500, 2808, 3008, 3310, 3600

Expansion valve:

- - Standard thermostatic expansion valve
- Y - Thermostatic expansion valve with leaving liquid temperature from +4°C down to -6 °C
- X - Electronic thermostatic valve, max. temp. of water produced: +4°C (for lower temperatures please contact us)

Model:

- F - Free-cooling
- B - Free-cooling glycol free

Heat recovery

- - Without heat recovery
- D - With desuperheater (partial heat recovery)

Version:

- A - High efficiency
- E - High efficiency low noise version

Coil:

- - Aluminium
- R - Copper
- S - Tinned copper
- V - Anti-corrosion coated aluminium (epoxy paint)

Fans:

- - Standard
- J - Inverter

Power supply:

- - 400V 3~ 50Hz with circuit breakers

Integrated hydronic module:

- 00 - without pump or buffer tank
- 03 - single high head pump and buffer tank
- 04 - single and standby high head pump and buffer tank
- P3 - single high head pump without buffer tank
- P4 - single and standby high head pump without buffer tank

WARNING:

The model "B" (Free-cooling, Free-cooling glycol free) glycol can not be provided with hydronic kit 03-04

Attention:

- the standard options are shown by the symbol °

Example of configuration code: **NRL2000°F°A°°°00**

This is an NRL unit of size 2000, with standard thermostatic expansion valve, Free-cooling model, without heat recovery, high efficiency, with aluminium condenser coils, standard fans, and electrical panel for compressor motors 400V 3~ 50Hz, and without pump or buffer tank.
